ABOUT ME

I am an aspiring software professional with a strong foundation in **web development, programming, databases**. I have hands-on experience through projects like **Collage management system , Bank management System, and Web Applications** using **HTML, CSS, JavaScript, PHP, MySQL, and Python**. Passionate about **problem-solving, innovation, and continuous learning**, I thrive in both independent and collaborative environments. With a blend of **technical expertise and soft skills**, I aim to deliver **scalable and impactful solutions** in software development.

SKILLS SUMMARY

- **Web Development language:** HTML , CSS , Javascript
- **Familiar with:** Python,,java, (PHP Basic Knowledge)
- **Databases:** MySQL
- **Technical Tools:** Visual Studio, Git, Github

PROJECTS

- **Collage Management System** (March 2024 sixth semester DR. MPS COLLAGE AGRA, India)
College Management System (CMS): Developed a college ERP system enabling online admissions, timetable generation, student progress tracking, and data analytics for academic management.

- **Library Management System (Web Application)** (March 2024 fifth semester DR. MPS COLLAGE AGRA, India)
Built a web-based system using **HTML, CSS, MySQL, and PHP** to automate book issuing, returns, and fine calculations, improving accuracy and efficiency in daily library operations.

- **Bank Management System** (September 2025 RBSMTC, UP, India)
A Bank Management System project demonstrates skills in Database Management (MySQL), Backend Development (Java), and Software Development Life Cycle (SDLC). Key features for a resume include secure user authentication, CRUD operations (Create, Read, Update, Delete) for accounts, transaction processing (deposits/withdrawals), and report generation.

- **Web Vulnerability scanning** (April 2026 RBSMTC, UP, India)
Designed and implemented an Automated Web Application Vulnerability Scanner in Python to detect Top-10 vulnerabilities including XSS, SQL, HTML Injection, and Remote Code Execution.
Developed Black-Box scanning modules for payload injection, crawling, and response analysis to identify exploitable endpoints with high accuracy.
Built an interactive GUI using Tkinter, integrating front-end usability with back-end security testing and automated reporting.
Executed comprehensive White-Box and Black-Box testing, improving detection precision, runtime efficiency, and vulnerability coverage.

EDUCATION

- **RBS Management Technical Campus (Agra)** 2026
Master Of Computer Application (MCA) UP, India
- **Dr. MPS GROUP OF INSTITUTES COLLEGE OF BUSINESS STUDIES (AGRA)** 2024
Bachelor of Computer Applications (BCA) **Percentage:** 69.6% UP, India
- **New St. Stephen Public School, Agra** 2021
(Intermediate) **Percentage:** 63.6% UP, India
- **New St. Stephen Public School, Agra** 2019
(High School) **Percentage:** 61.5% UP, India

LEARNING AND ACHIEVEMENTS

- Completed projects in Java and MySQL including College Management System and Bank Management System
- Strong understanding of OOPs, DBMS, and Software Development concepts
- Actively practicing coding and problem-solving on online platforms
- Familiar with GitHub for version control and project management
- Quick learner with interest in Backend and Software Development
